

ADITHYAN K S

Frontend Developer (React.js)

+91 7994940757 — ksadithyan.mec@gmail.com — LinkedIn

Professional Summary

Frontend Developer with nearly 3 years of experience building scalable web applications using React.js and JavaScript (ES6+). Experienced in developing reusable UI components, implementing Redux for state management, integrating REST APIs, and creating responsive interfaces. Skilled in integrating React applications with Drupal CMS backends and passionate about building high-quality frontend experiences. Seeking Frontend React or Junior Full Stack (React + Node.js) opportunities.

Core Competencies

- React.js Development
- Redux
- REST API Integration
- Responsive Web Design
- Component-Based Architecture
- Performance Optimization
- State Management
- Agile Development

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Next.js (Basics), Redux, React Hooks, React Router

Backend/CMS: Drupal CMS, REST APIs

Libraries: Ant Design, Ant Design Charts, jsPDF, PPTXGenJS

Tools: Git, GitHub, VS Code, Postman

Professional Experience

DBiz.ai

Frontend Developer

March 2023 - July 2026

Kochi

Employee Experience Platform

- Developed an enterprise survey platform using React.js for HR teams to create, publish and analyze employee feedback surveys.
- Built 20+ reusable React components including forms, tables, modals and shared UI elements used across multiple modules.
- Managed application state using Redux and integrated 15+ REST APIs for survey management, authentication and reporting.
- Improved application performance through component memoization, lazy loading and reusable component design.
- Collaborated with backend developers and QA engineers to deliver production features in Agile sprint cycles.

Feedback360 Analytics Platform

- Developed interactive employee performance dashboards using React.js, Redux and Ant Design Charts.
- Implemented filtering, search and pagination for large datasets to improve data accessibility.
- Integrated PDF and PowerPoint export functionality using jsPDF and PPTXGenJS.
- Built reusable dashboard widgets shared across multiple reporting modules.
- Optimized API calls and component rendering to improve dashboard responsiveness.

Survey Management Portal

- Developed a multi-step survey creation workflow using React Hooks and Redux.
- Built dynamic questionnaire management with configurable validation and draft autosave functionality.
- Optimized rendering of large dynamic forms containing over 100 configurable fields.

- Developed reusable form components to simplify future feature development.
- Integrated role-based access for administrators and managers.

Key Achievements

- Developed 20+ reusable React components adopted across multiple enterprise modules.
- Integrated 15+ REST APIs supporting authentication, surveys, dashboards and reporting.
- Managed application state across 8+ feature modules using Redux.
- Resolved 40+ production and QA-reported frontend issues across multiple releases.
- Contributed to 12+ production deployments following Agile sprint cycles.

Education

Government Model Engineering College, Kochi	2022
Bachelor of Technology in Electronics and Communication Engineering	
CGPA: 7.2
